

# NEW TOOLS

GT1049

## Gator Blade I

Features two opposing arched blades. The narrower blade allows for more scraping pressure for around rear defrosters and for adhesive removal on surfaces where metallic razor blades scratch surfaces.

GT1050

## Gator Blade II

Features three functional edges. The first 3.5" linear edge is great for lifting bottom rollup gaskets while tucking the film safely beneath to reduce peeling. A long slender acute point works for reaching into tight corners of quarter windows and behind front and rear gaskets of roll-downs. The opposing 18" radius edge is also 3.5" wide and also functions well for lifting and tucking. The 1.95" third edge features a 4" radius blade that fits tighter curvature situations and is a good pressure concentration blade.

GT1047

## 5" Fusion Grip Handle

Designed to optimize your leverage in removing mounting solution. Holds [GT257](#), [GT258](#), [GT203](#) or [GT117](#) squeegee blades. Great for high performance automotive films and smaller residential windows.

## ProSprayer Hand Sprayers

Viton rubber is highly resistant to a wide range of chemical  
1 Year Limited Warranty  
Designed for tough industrial applications, and automotive detailing.

DOTRIX

## Dot Matrix Cover

The only true way to deal with dot matrix. Unlike window films, the pressure-sensitive backing allows for easy installation without heat shrinking.
